

This is me!

Experience

05

2015.01 - Present

Loopinglovers Cofounder & 3D Artist

- ✿ Creative force and R&D leader of Looping Lovers Studio.
- ✿ Co-founded a studio and developed it from a purely artistic venture into a creative production company, blending visual art with high-end commercial storytelling.
- ✿ Delivered cutting-edge content for global campaigns, brand identities, and immersive digital experiences for top-tier clients including Adidas, Nike, OpenAI, Dior, and FFS, managing budgets of up to €100,000
- ✿ Hands-on experience in executing projects with expertise in 3D animation pipelines, real-time production, and custom-developed AI workflows.
- ✿ Experienced in managing projects end-to-end — from initial brief to final delivery — while meeting tight deadlines, collaborating directly with clients, and leading teams to achieve project goals.
- ✿ Driven by curiosity, I continuously explore and master new skills, which has opened opportunities to work across evolving media fields such as AR, VR, NFTs, real-time experiences, and AI projects.

2016.03 - 2019.04

T-T-T 3000 Founder

- ✿ Viral recognition for my bachelor thesis, an AR table tennis prototype, resulting in funding the startup.
- ✿ Received governmental funding and achieved commercial success. Exhibited across Europe and Asia.
- ✿ I led the development, operations, and rollout, transforming an academic concept into a fully realized product at the intersection of design, technology, and experience design.

2014.08 - 2017.06

Artificial Rome Interaction designer

- ✿ Berlin-based creative studio was the starting point for me as an intern, trainee, and freelancer.
- ✿ Learning the fundamentals for production structures and reliable execution within real client projects.

Software

06

C4D Octane

Blender Cycles

Unreal Basics

Resolve Basics

Adobe Suite, Substance

Comfy UI, ChatGPT

Excel, Figma, Miro, Reddit

Overall highly adaptive to whatever works best to get the job done.
